

Every Step Protected. Every Word Heard.

A privacy-first women's safety & legal assistant for Punjab, Pakistan.
It opens as a weather app. It protects like a guardian.

The Gap Between Threat and Intervention

52% of women in Pakistan experience violence in their lifetime.

The Threat	The Traditional Gap
Street Harassment	Who do I call? Is this route safe?
Domestic Violence	What are my actual legal rights?
Digital/Cyber Bullying	How do I build a formal complaint?
Device Compromise	If the abuser takes my phone, my evidence is gone.
Network Blackouts	No signal or data means emergency services are unreachable.

Mehfooz bridges this gap. One app. Six pillars. Zero compromise.

The Architecture of Protection

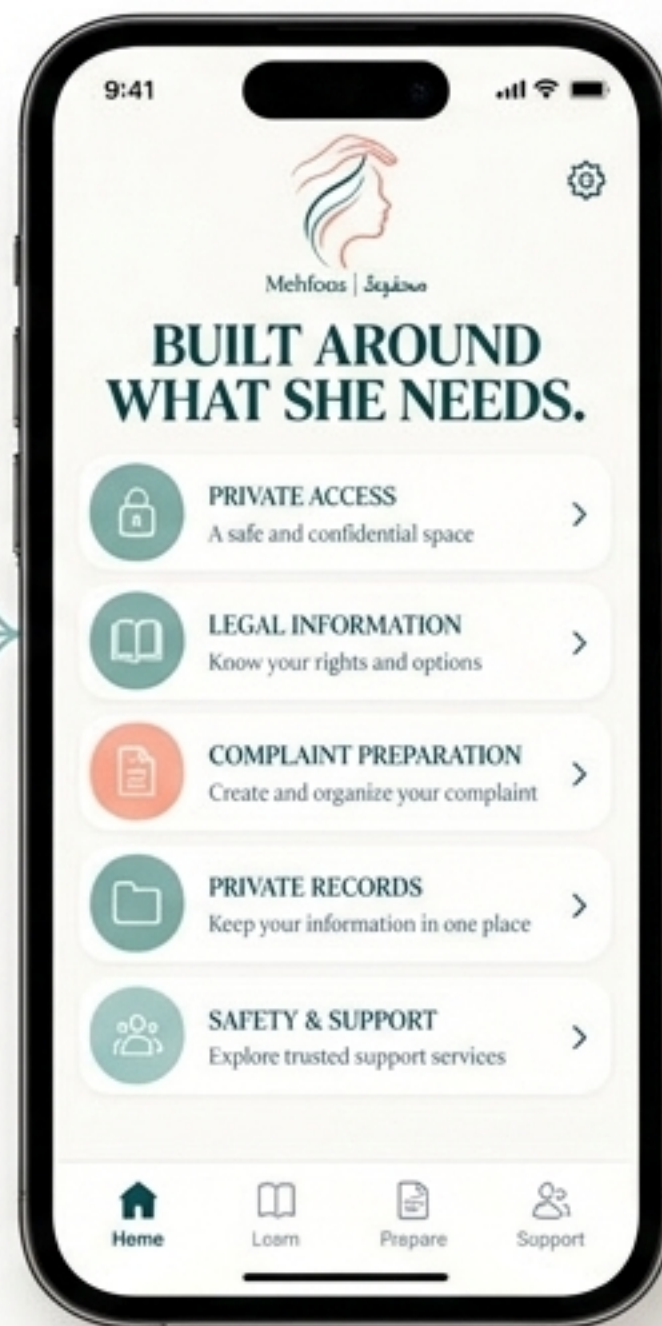

Stealth Cover
Authentic weather interface
masking the ecosystem.

Legal Advisor
Voice-enabled AI chat
grounded in 34 Punjab
protection laws.

Complaint Builder
AI narrative polish & routing
to 9 official departments.

Incident Vault
AES-GCM-256 encrypted
evidence locker.

Safe Navigation
Verified, safety-scored
pedestrian corridors.

Crisis SOS
One-tap dispatch to Police 15
with silent audio recording.

Invisible Until Needed

Opens as a fully functioning weather application. No one casually looking at the device suspects it is a safety tool.

The Disguise

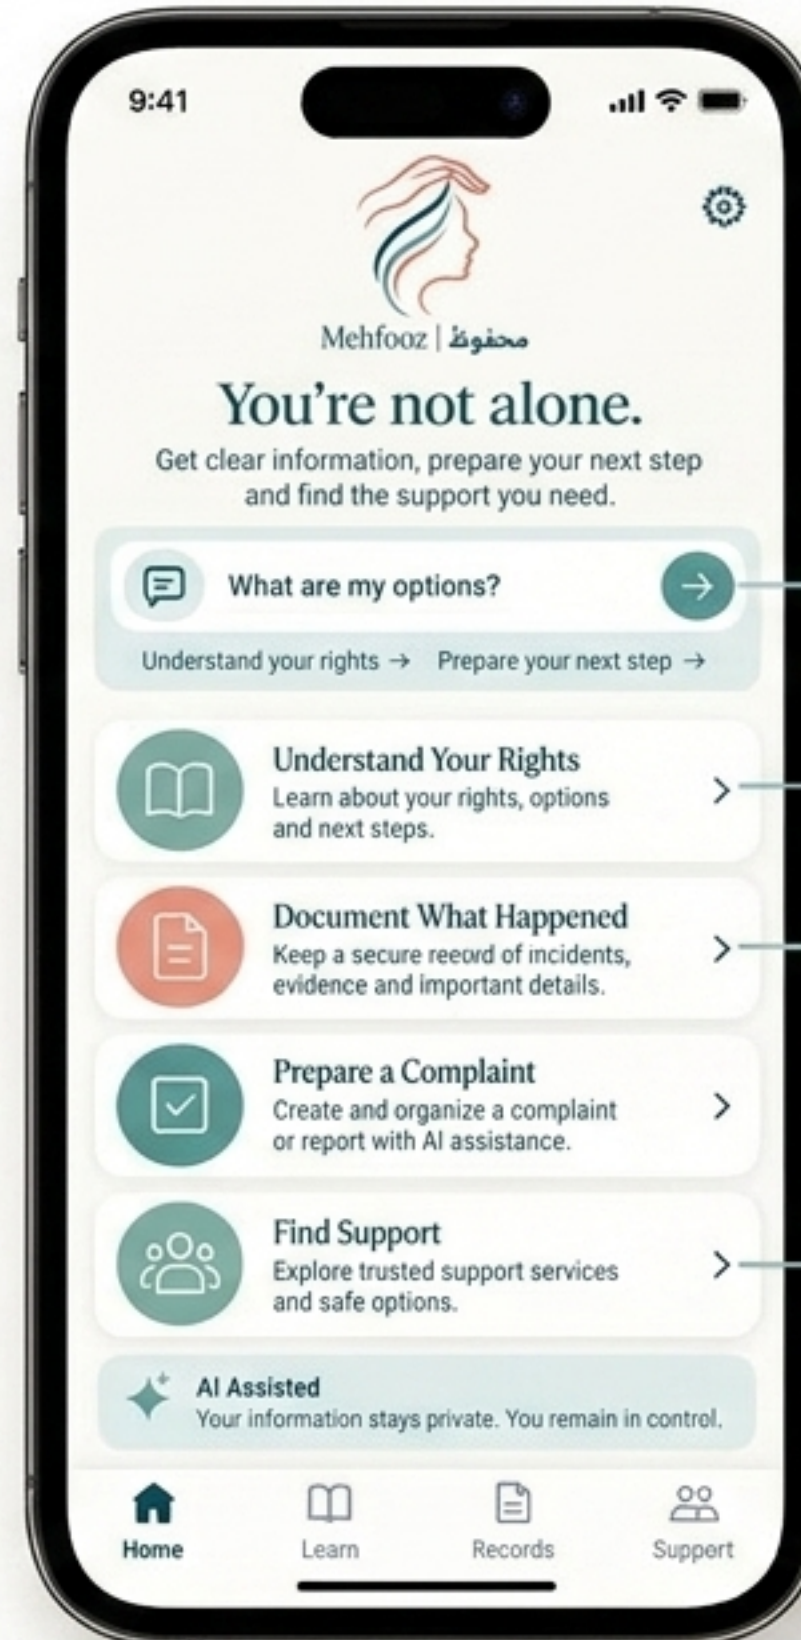

Instant Escape

A top-right close button allows for instant dismissal back to the weather screen.

Entering the secret PIN (e.g., 1520 or *mehfoozdemo*) instantly reveals the full protection toolkit.

The Unlock

The Unlocked Command Center

Understand Your Rights
Direct access to the legal AI.

Document What Happened
The secure incident vault.

Prepare a Complaint
AI-assisted formal reporting.

Find Support
Explores trusted support services and safe options.

Intuitive bottom navigation (Home, Learn, Records, Support) ensures an OS-level navigation feel.

Punjab AI Legal Advisor

Purpose

Bridging the legal knowledge gap without jargon.

Bilingual Accessibility

Ask questions in plain English or Urdu. The system submits exact Urdu text and responds natively.

Zero Hallucination Policy

Powered by Gemini Hybrid RAG (60% embeddings + 40% keyword scoring), grounded strictly in a localized corpus of 34 Punjab protection laws (e.g., PECA 2016, PPWVA 2016).

Turning Panic Into Formal Action

Your Rights
You have the right to be safe, free from violence and harassment.

Legal reference
Protection Against Harassment at the Workplace Act, 2010

Raw Input

The user inputs basic incident details. Missing fields are handled as 'Not provided' to prevent AI fact-invention.

✨ **Rewrite with AI**
Fixes typos, grammar, and emotional panic-typing into formal, neutral legal text via a dedicated endpoint.

Prepare Your Complaint
Turn your information into a draft you can review and edit.

1 DRAFT Draft created from your information
2 REVIEW & EDIT Check, edit and make it your own
3 CONFIRM Save or proceed

AI Draft You're in control

To: [Author's Name]
Subject: Personal Complaint

Dear Sir/Madam,

I am writing to file a formal complaint regarding [brief description of what happened]. The incident occurred on [date of incident], I am requesting that the necessary steps be taken in accordance with the applicable laws and regulations.

I have attached any relevant documents and am available to provide further information if needed.

Sincerely,
[Your Name]

Back Continue

Formal Petition

Generates a PDF titled 'Mehfooz — User-Generated Protective Petition Draft' featuring official recipient headings and standard legal disclaimers.

Zero-Knowledge Incident Vault

AES-GCM-256 Encryption

All voice notes, photos, and harassment timelines are encrypted locally on the device using the Web Crypto API.

Re-Authentication Gate

Sensitive records remain locked until the vault password is re-entered upon mount or browser refresh.

Safe Export

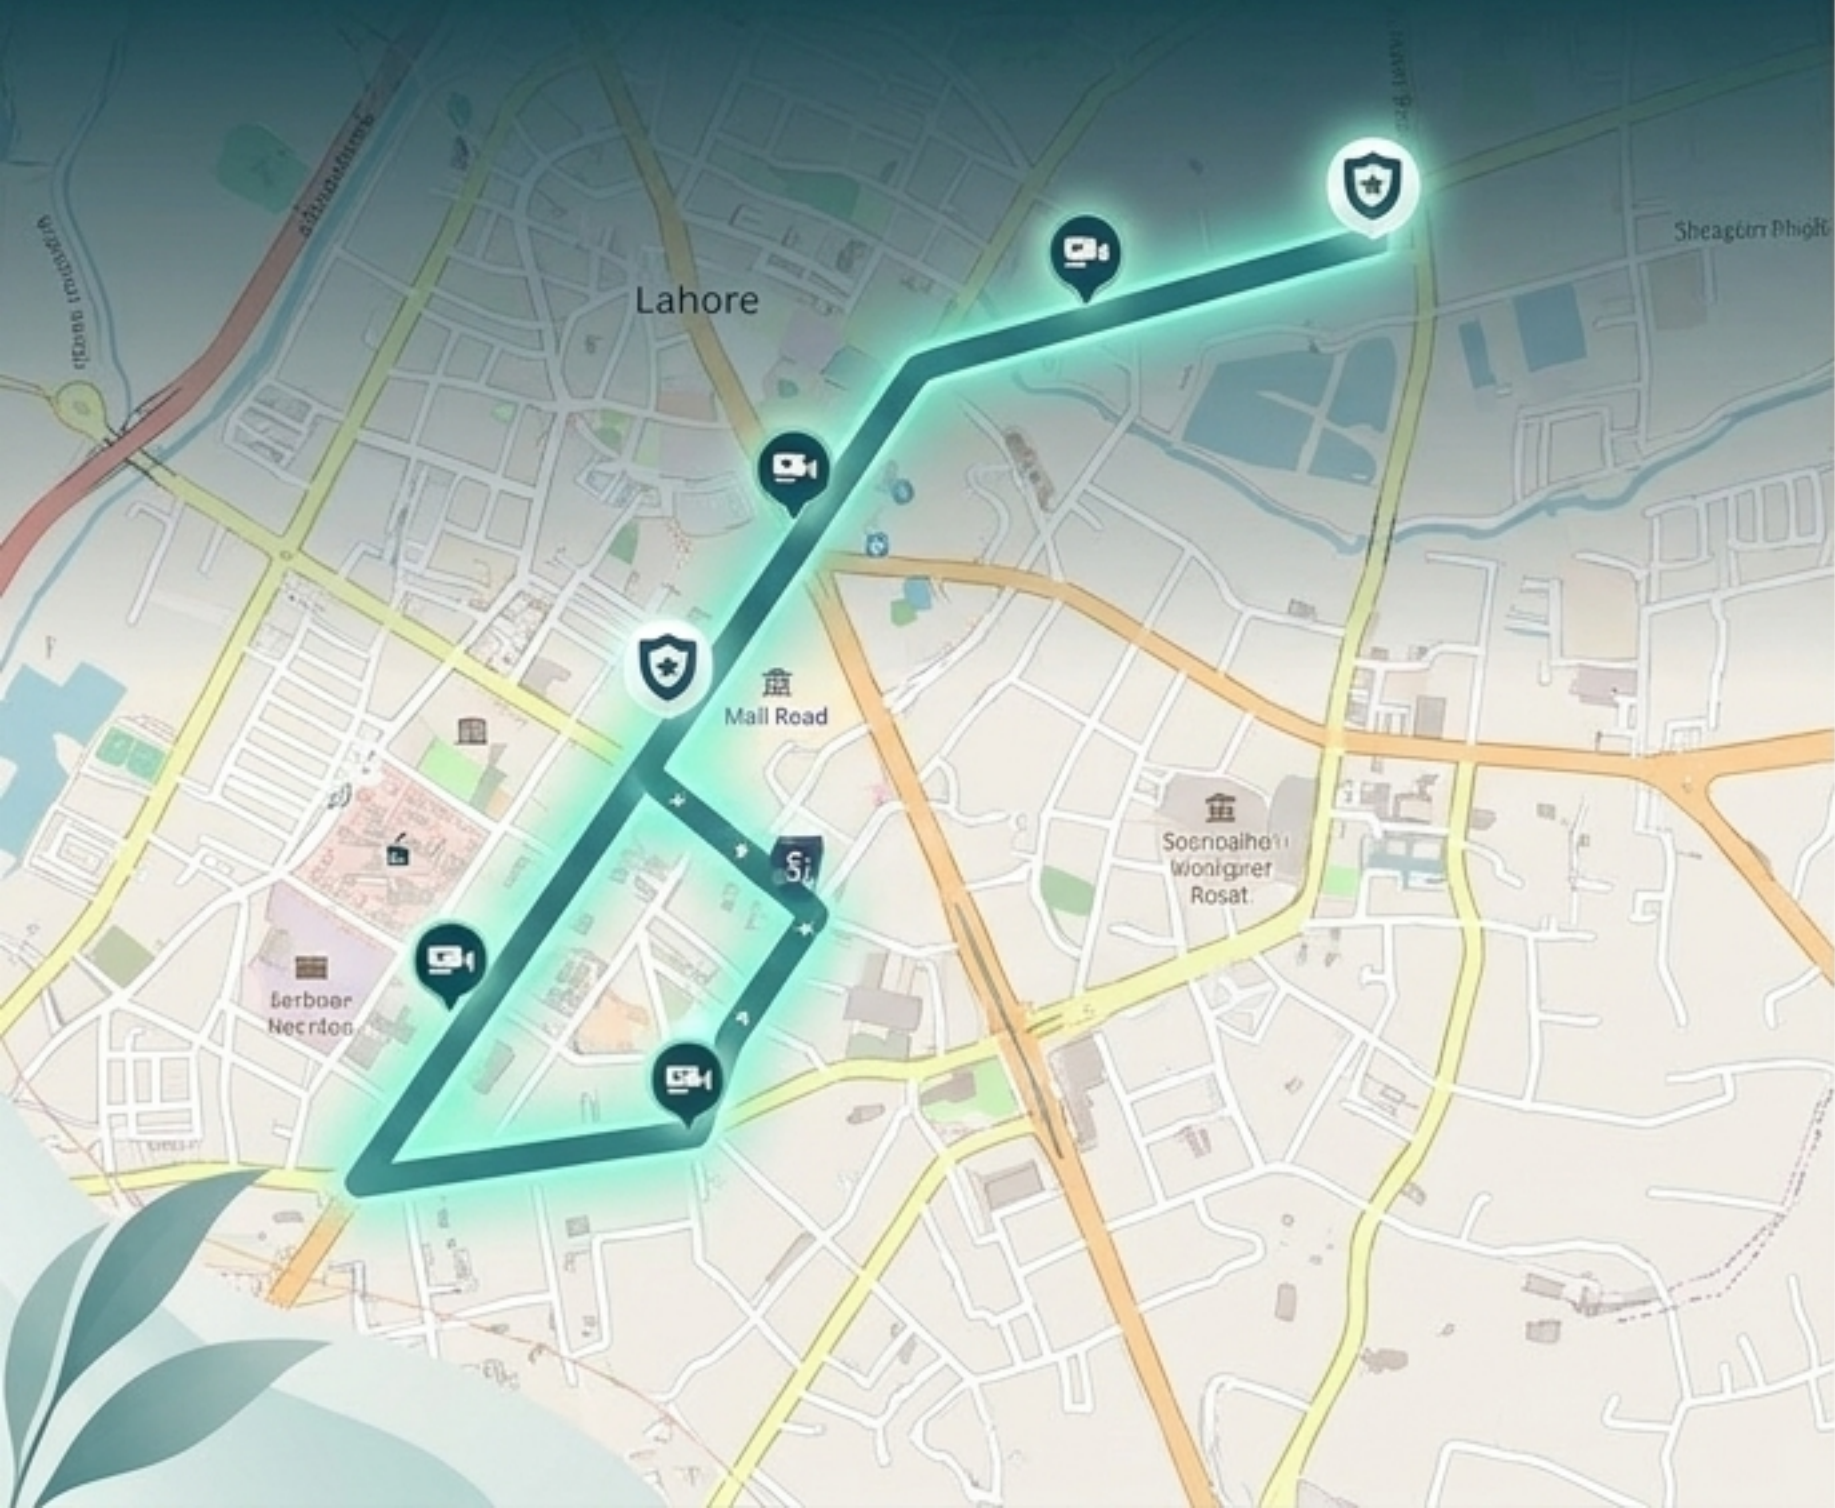

Exports are generated as Password-Protected PDF Documents strictly titled "Protected Incident Record" (requires 8-character password).

Cancel Navigation

Safely routes back to the legal assistant instantly if a user cancels transferring a draft note.

Safe Corridor Navigation

Purpose: Preventative physical safety during transit.
Uses Leaflet and OpenStreetMap.

Route A (Safe Corridor Grade A+)

100% Well Lit • 18 PSCA Cameras • 3 Police Posts
Verified Safe Haven stops active.
(Chosen by 94% of local women after 7 PM)

Route B (Direct Backstreet Grade B-)

40% Poor Lighting • 0 CCTV Cameras • Quiet Alleyway
5 mins faster but high risk.

Community Integration

Includes a dedicated Hazard Reporting Modal
for logging real-time street hazards.

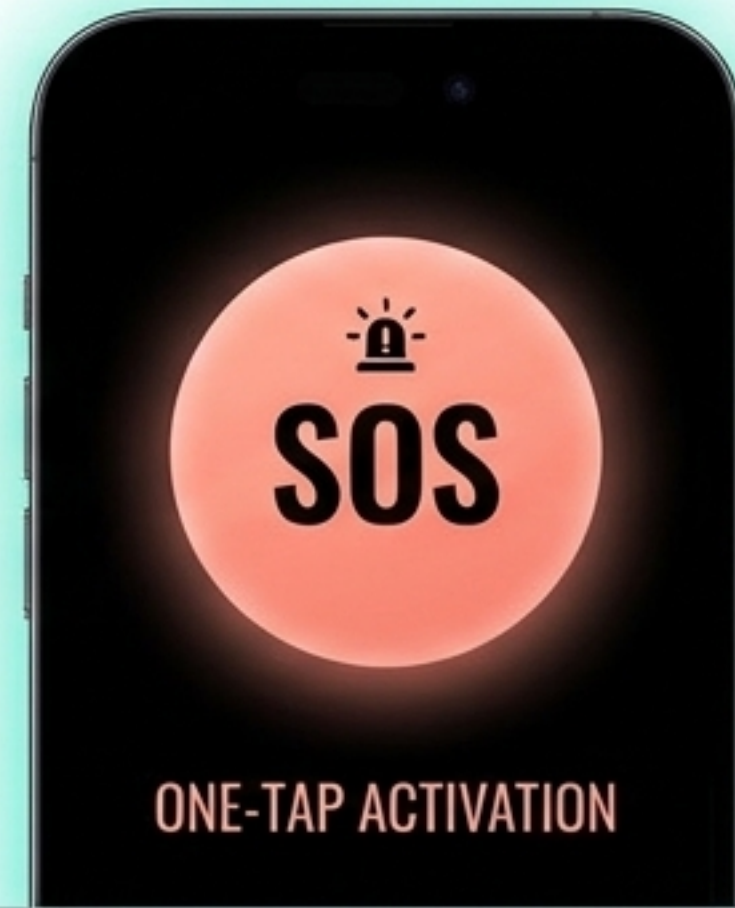

Silent Destination Check-In & Crisis SOS

Safe Check-In (Automated Overwatch)

- User sets a dynamic local time destination timer.
- Live-location is automatically shared with contacts if timer expires without a safe arrival.
- Enforced minimum 1-minute journey prevents accidental misfires.

Crisis SOS (Immediate Resolution)

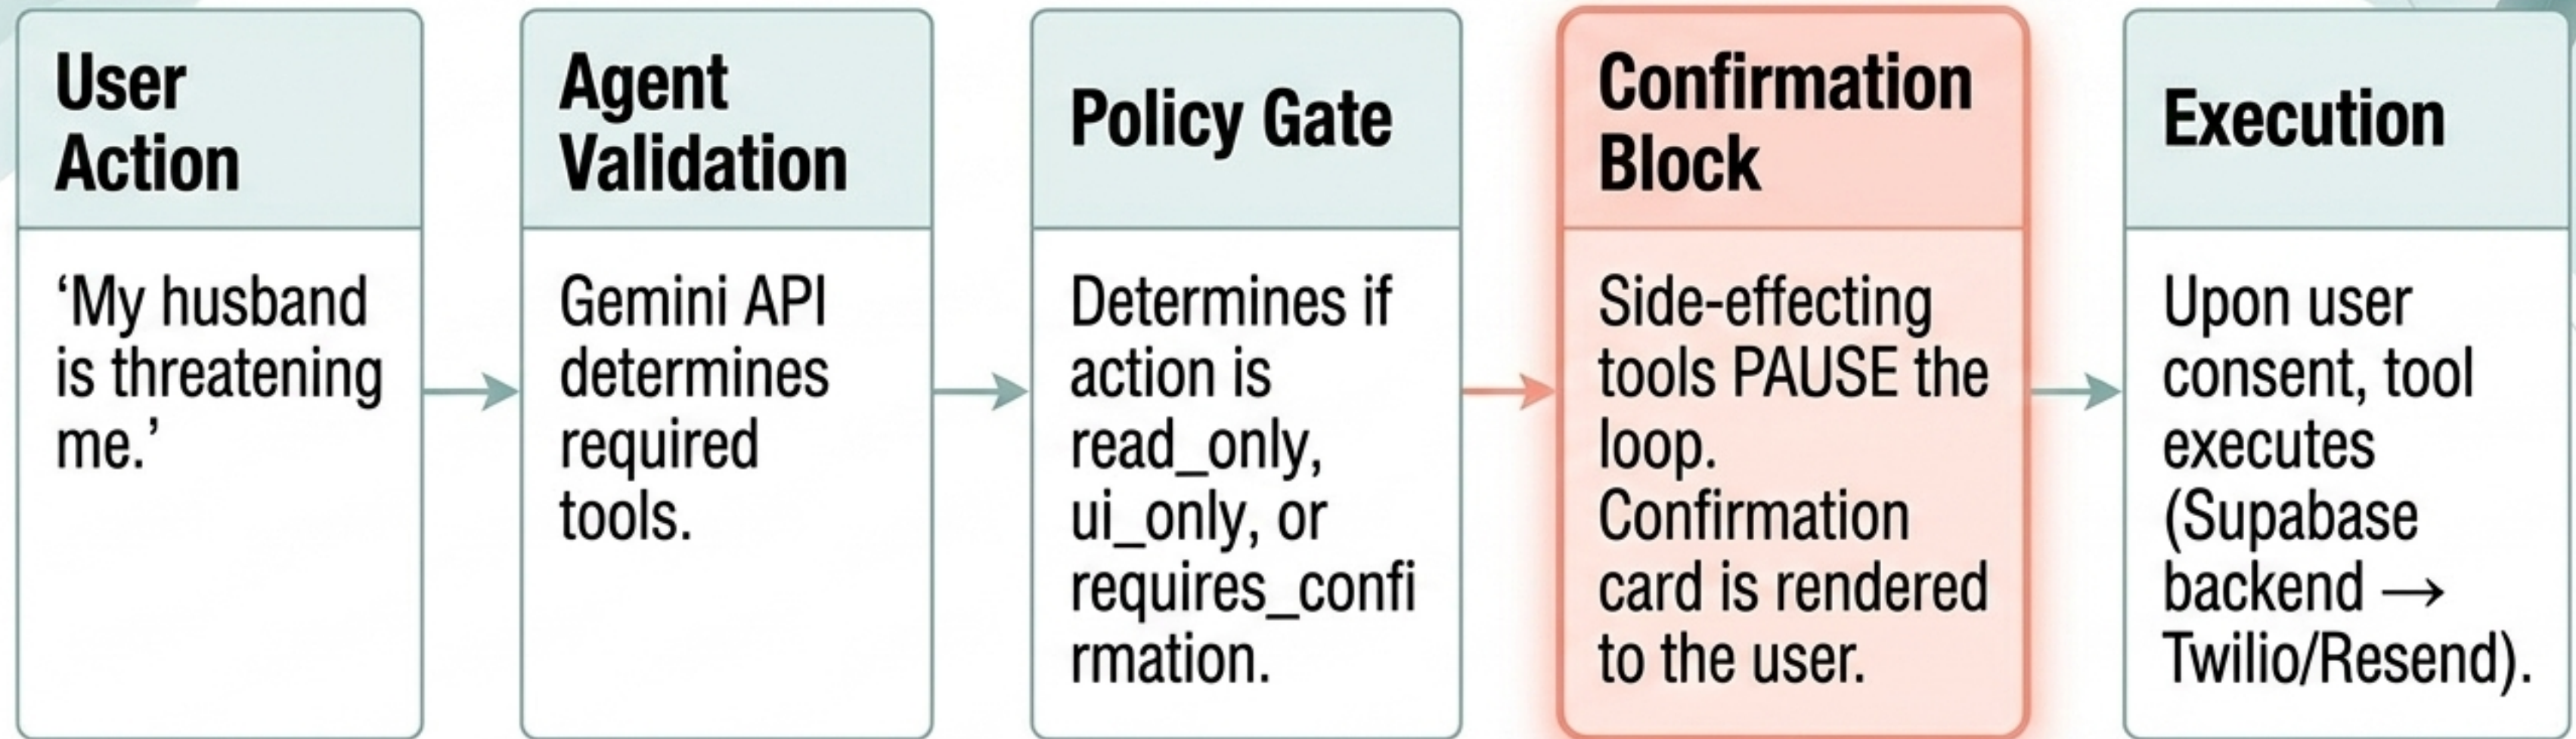

- One-tap dispatch simultaneously calls Punjab Police 15.
- Silently triggers background audio recording.
- Broadcasts SMS location to trusted network.

Zero-Signal Offline Resilience

Capability	Standard Apps (Online)	Mehfooz (Zero-Signal Fallback)
Emergency Contact	Standard apps fail	Client-side cached dialers for 15 (PSCA), 1043 (PCSW), and 1122 (Rescue) under 5ms.
Legal Rights	Cloud-based AI fails	Pre-loads 8 core legal protections and FIR filing steps on local device memory.
Location Dispatch	WhatsApp/Data fails	Compiles exact GPS coordinates into a raw cellular SMS dispatch.
Evidence Collection	Cloud syncing fails	Seamlessly falls back to local AES-256 storage for voice memos and photos.

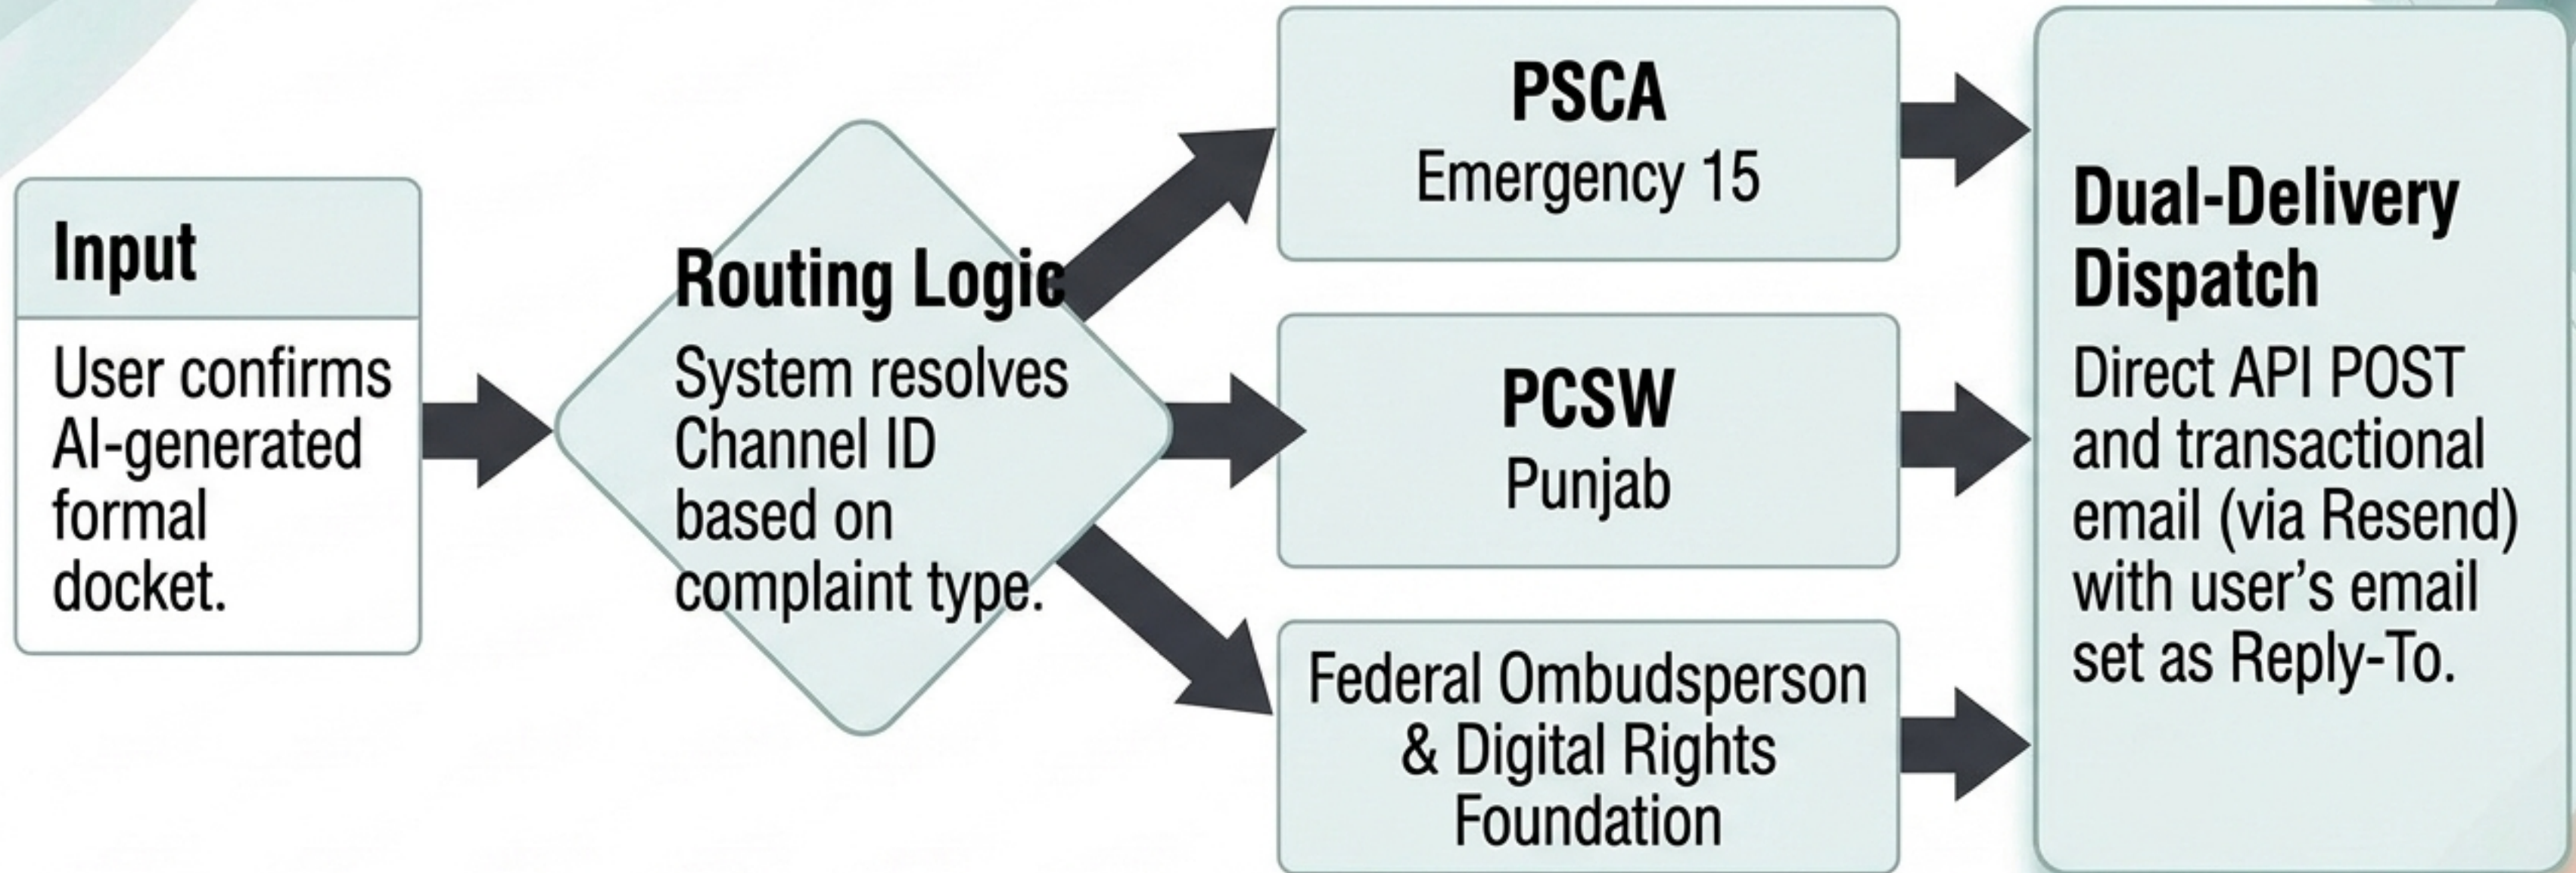

System Architecture: The Agentic Loop

Strict Safety Invariants

The AI cannot contact authorities without human confirmation.

Department Routing Pipeline

Tracking: Users receive a confirmation copy. Reference numbers tagged 'Unverified - Pending Confirmation' until officially acknowledged.

Engineered for Security & Privacy

Input Sanitization Layer

`validateAndSanitizeTextInput` blocks script tags, SQL injection, and sanitizes narrative inputs.

Deep File Validation

Rejects disguised executables by inspecting file header magic bytes (e.g., JPEG FF D8 FF, PDF %PDF-).

Rate Limiting & Helmet

Enforced Content Security Policies and per-route rate limiting (e.g., 20 req/10 min).

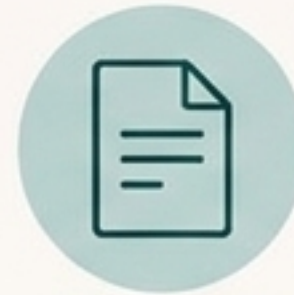

Auth & Privacy

Supabase JWT Auth with Row-Level Security.
Explicit privacy opt-in defaults during onboarding.

Choices That Are Always Yours
